

ORE MOWAIYE

London, UK | oremowaiye1@gmail.com | oremowaiye-dev.netlify.app | linkedin.com/in/oremowaiye | github.com/oremowaiye

PROFILE

Test automation engineer with 2+ years' experience across test automation, software development and web technologies. Automates testing of critical systems for a regulated UK banking client (via Scale Factory) using Java, Selenium WebDriver and Jenkins CI/CD pipelines, maintaining 50+ scripts across 10+ business-critical workflows. Combines a software development bootcamp (JustIT), full-stack delivery (Python, Flask, PostgreSQL) and freelance frontend work with an MSc in Computer Science with Cyber Security (in progress) and ISTQB certification. Targeting Test Automation Engineer, SDET and QA Automation Engineer roles building on this hands-on foundation.

CORE SKILLS

Test Automation & QA	Selenium WebDriver, test framework design, regression suite maintenance, test case design, manual and exploratory testing, defect management
Programming	Java, Python, JavaScript, SQL, RESTful APIs
CI/CD & Tooling	Jenkins, Git, JIRA, Azure DevOps
Databases & Systems	MySQL, PostgreSQL
Ways of Working	Agile delivery, sprint ceremonies, stakeholder communication, requirement coverage reporting
Certifications	ISTQB Certified
Also	HTML5, CSS3, React, Flask, Bootstrap, WordPress

EXPERIENCE

Automation Engineer, Scale Factory

Client: regulated UK banking institution | London, UK

April 2024 - Present

- Built and maintain 50+ Java/Selenium automation scripts validating business requirements, end-to-end processes and user access controls across critical banking systems in a regulated, audit-sensitive environment.
- Designed reusable, structured Selenium test scenarios that automated validation across 10+ business-critical workflows spanning UI and backend integration points, cutting reliance on repetitive manual regression testing.
- Maintained automated regression suites within Jenkins CI/CD pipelines and tracked defects through JIRA, working with developers, business analysts and QA colleagues across 10+ Agile sprints.
- Communicated automation results, defect trends and requirement coverage to technical and business stakeholders, directly informing test strategy and release decisions.

Freelance Frontend Developer, Self-employed

London, UK

June 2023 - April 2024 (Part-time)

- Delivered responsive, cross-browser websites for freelance clients using HTML, CSS and JavaScript, translating requirements and designs into functional, user-focused experiences.
- Managed freelance projects end-to-end, gathering requirements, troubleshooting issues and delivering iterative improvements alongside full-time employment.

Web Manager, WCI Croydon

London, UK

December 2022 - December 2024 (Part-time)

- Reduced average page load time by 20% and strengthened security posture across multiple organisational websites through infrastructure and UX improvements.
- Grew organic search visibility and kept sites running reliably day-to-day, developing custom WordPress themes, leading SEO optimisation, and resolving frontend, content and configuration issues.

PROJECT EXPERIENCE

Film Database Web Application, JustIT

January 2024 - March 2024

- Built a full-stack film database web app (Python, Flask, PostgreSQL) with search, ratings/reviews, and RESTful APIs for data retrieval and submission.

EDUCATION

MSc, Computer Science with Cyber Security, Wrexham University	2025 - 2027 (in progress)
NVQ Level 3, Software Development, JustIT	2024
Engineering Foundation Degree, Cardiff University	2020 - 2021
A Levels: Maths, Chemistry, Computer Science, Hatcham College	2018 - 2020
